Portfolio: [Vishakha - UX/UI Designer](#)

Summary

UX/UI Designer with over 6 years of professional experience in pharmaceutical and healthcare environments, where accuracy, responsibility, and quality are very important. I have a strong foundation in user research, interaction design, and prototyping, and I use these skills to create clear and user-friendly digital products. My background has helped me to develop strong problem-solving skills, attention to detail, and a reliable work ethic. I have experience working through the full UX process and am currently contributing to a live product as a volunteer UX designer, applying real user insights to practical design solutions.

UX/UI Projects

Austin Kids' Directory – Volunteer UX/UI Designer (Ongoing)

- Leading the end-to-end redesign of a parent-focused directory website to improve usability, navigation, and content discoverability
- Conducted user interviews with parents to identify pain points and unmet needs
- Performed competitor analysis to evaluate industry patterns and usability gaps
- Translated research insights into user flows, wireframes, and design recommendations
- Collaborating with stakeholders to balance user needs with business goals
- Focused on improving information hierarchy and mobile-friendly experience

Savelt – Money-Saving App

- Designed a personal finance app to help users set savings goals and track progress
- Created user flows, wireframes, and high-fidelity prototypes in Figma
- Defined visual identity and UI components for a consistent experience
- Conducted usability testing and iterated designs based on feedback
- Case study: [Money Saving App :: Behance](#)

Gigglegram – Baby Tracking & Milestone App

- Designed a mobile app to help parents track feeding, sleep, and diaper routines
- Integrated milestone guidance and age-appropriate play activities
- Conducted user research, built personas, and mapped user journeys
- Created wireframes, prototypes, and usability test plans
- Tools used: Figma, FigJam, Miro
- Case study: [Baby Tracking/ Activity app :: Behance](#)

Recipe App – Find, Cook & Share

- Designed a recipe discovery app focused on ease of use and engagement
 - Created user flows, wireframes, and visual designs
 - Enabled filtering, step-by-step cooking guidance, and recipe sharing
 - Developed interactive prototypes in Figma
 - Case study: [Recipe App :: Behance](#)
